

BowWow Fun Towne Web Cams

Step 1: Open Internet Explorer from your desktop. Now click on **Tools – Internet Options** when Internet Explorer opens up. In your internet options window click the **Security** tab. (see below)

Step 2: Click the **Custom Level** button towards the bottom. On the Security Settings window scroll down until you locate:

- *Download unsigned ActiveX Controls*
 - *Initialize and script ActiveX Controls not marked as safe*
- Check both boxes to **Prompt** (see below).

Step 3: Press **OK** and press **OK** on your internet options windows to be sure the configuration is saved. These steps will assure the download of the DVR's ActiveX controls to enable login. If using Windows Vista as your operating system, be sure to look around the how-to page for more details on complete integration (and troubleshooting) of our software.
